a) add up to ~~130~~

30, 40, 50, 10

b) in order = add up to 130

i tried multiples of 10, but it didnt work.

$$10 + 20 + 30 + 40 = 100$$

So this time im going to go up in 15.

126, 127, 128, 129

~~130~~ i started by doing

$$130 - 4 = 126$$

c) in this question, i aimed for a higher number than 130, so i could put a negative number in it.

$$50, 50, 40, -10 = 130$$

d) ~~20, 21, 22, 23~~ 90 20, 20, 10, 40.

e)

Wednesday 29th June 2022

Four consecutive numbers.

100, 20, 10, 0

$$100 + 20 = 120$$

$$120 + 10 = 130$$

$$130 + 0 = 130$$

~~30, 31, 32, 33~~

$$~~30 + 31 = 32~~$$

$$~~32 + 33 = 34~~$$

$$~~34 + 33 = 37~~$$

$$30 + 31 = 61$$

$$61 + 32 = 93$$

$$93 + 33 = 126$$

It is only 4 onday and I going to put 34 not the 30.

$$~~30 + 31 = 61~~$$

$$~~30 +~~$$

$$30 + 31 = 61$$

$$61 + 32 = 93$$

$$93 + 33 = 126$$

$$126 + 34 =$$

100, 30, 30

-30
