Making 3.7

Four bags contain a large number of counters with:
0.1, 0.3, 0.5 & 0.7.

Can you pick ten counters from the bags that add up of 3.7?

Can you make 3.7 in different ways? Is there anything that you notice while making 3.7?

0.1	0.3	0.5	0.7	0.1	0.1	0.1	0.1	0.5	0.2	0.5	0.5
0.5	0.5	0.1	0.7	0.7	0.1	0.1	0.7	0.5	0.5	0.5	0.1
0.1	0.1	0.3	0.5	0.5	0.5	0.1	0.1	0.1	0.1	0.1	0.1
0.5	0.5	0.3	0.1	0.1	0.1						

~~3.7~~

~~3.7~~ 1, 3, 5, 7 are odd, 10 is even, odd + odd = even, 3.7 is odd.
