 - 0 1:58
 - 0 1:59

2. 0 1:00 through to 00:00 (24:00)
 = 24 however minus two for 05:00 and 15:00, so = 24
 - 2
22

∴ 22 because there are 16

x	16	22 hours and
1	32	fives in each hour.
+	220	
	352	= 352 fives

 excluding 05:00 and 15:00.

= 16 fives in one hour besides 05:00 and 15:00

3. For 05:00 and 15:00 add 60 because,

- example:
- 05:00
 - 05:01
 - 05:02
 - 05:03 etc.

∴ each hour passes a minute 60 times so, 60
 + 16 (because of normal five besides the hour)
76

Since there are two hours that have fives in them (05:00 & 15:00).

you have to do this;

$$\begin{array}{r} 7^{\uparrow} 6 \\ + 7 6 \\ \hline 1 5 2 \end{array}$$

∴ you have to add 352 to 152 so...

$$\begin{array}{r} 3^{\uparrow} 5 2 \\ + 1 5 2 \\ \hline 5 0 4 \end{array}$$

fives in one
24 hour day

Answer #1: There are 504 fives in one day on a 24 hour clock.

Answer #2: There are the same amount of fives in a 12 hour clock as there are in a 24 hour one because instead of having 05:00 & 15:00 on a 24 hour clock you have 5:00am & 5:00pm on a 12 hour clock!
