

- e goes with k shape's name: cube
- g goes with q shape's name : triangular prism
- p goes with c shape's name : cuboid
- a goes with h shape's name : trapezoidal prism
- f goes with b shape's name : tetrahedron
- r and j shape's name : hexagonal prism
- o,s shape's name : hexagonal prism
- d ,n shapes's name : “
- l,m shape's name: triangular – based pyramid

I cut the pieces and tried to put them together. And I got 9 pairs. For the shape's name I searched to Google.
