

Doğ Çi Hüi Minh Nöpe Grade 6 Kelvin Grove State College  
BRISBANE, AUSTRALIA

Midday  
Light off  
Wakes up  
Goes to school

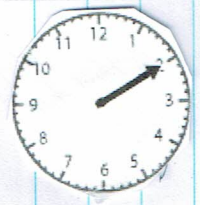

Since these clocks shall only be either Monday or midnight. Since there's only the midday early option, this clock is midday.

It only makes sense that Sam sleeps at 9.45 pm as the other options are a tad to early.

If Sam goes to school starts at 7am. Sam must be ready. That is why I think she wakes up at 7.15am.

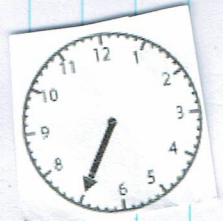

This only makes sense as school starts at 8am. All the others are too early or too late.

Mon

On Monday, Julie bought some sweets.

Tue

On Tuesday, she played with Sam.

Wed

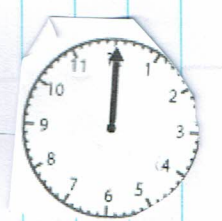

On Wednesday, Julie's teacher kept her in class for five minutes.

Thu

On Thursday, she practised in the band.

Fri

On Friday, it was raining so she hurried straight home.
