Which Scripts?

WE HAD TO SEE THE SIMILARITIES BETWEEN EACH SYMBOL. YOU NEED TO FIND SYMBOLS THAT LOOK AND HAVE THE SAME AMOUNT OF LETTERS ETC.

- We started by identifying all the twos since they were really similar
- Then we looked at the twenty fives since they had twos in them and they were 2 numbers long
- After that we found out the fifty eights and we identified that they also had a five in them
- Next the obvious choice is eighty three because that has an eight in it as well.
- Penultimately we did thirteen as that has a three in it.
- Finally, we did one hundred as it has a one in it and is three digits.

十三	93	13	56	13
八十三	73	83	66	83
五十八	47	58	66	58
二十五	24	25	26	25
-百	900	100	500	100
=	2	2	2	2
