

$$0.0001 \times 240000 = 24$$

$$0.00001 \times 2400000 = 24 \quad 4800000.0000$$

$$0.000001 \times 24000000 = 24$$

No limit BOOM!

We found out that you can keep adding more zero's onto 0.01 and more on 240 as well so there is no limit?
